I got to learn a lot about project finance and how amazing the field is. Being a fresher, it has always been difficult to enter a niche field at the start of your career, but here at Synergy I got actual exposure on how things work and how to deal with different intricacies which truly fascinate me about the field and pushes me to learn more about it. Mentoring by Aman Narang was one of the best experiences at synergy. He has always been calm and supportive with me even when I mess up with things. Had a great learning experience overall.

My internship at Synergy Consulting gives me immense project finance and financial advisory exposure. A flat organizational structure with no hierarchy system helped me to interact with anyone and get help whenever required. While working on live project, the continuous push of 'attention to detail' and 'finding the answer to every question possible in the analysis' helped me to understand my work in a multidimensional way. ▶ The people, the support and encouragement that an intern gets is immense. Initially when I was given the task to do a secondary research and when I deviated a bit, I got the guidance from my Associate Director, Senior Associate and their constant support motivated me to collect and compile even more data points and give them the best inferences possible. The motive and work ethic of the employees to work till completion of a task or project, motivated me to work off-timings as well. Such is the drive for passion, the firm and the employees hold. As an intern, you mostly get to work on dummy or old projects in most of the firms. But, at Synergy, I got the opportunity to work on live projects. I even got to sit in one of the client's call. Including an intern in front end work is an immersive experience. The work, the open-door culture where you get to talk to any person of any designation and the support that the respective work team, HR team provides is priceless. Thus, my internship experience has been fruitful enabling me to learn and hone my skills in financial modelling, analytical thinking and presentation skills. It improved me professionally and as a person. Thank you, Synergy, for the lovely opportunity.
